Model/Part No.:	ACM135, ACM150		

Re: ACM135/ACM150 Plug-n-Play compatibility with select Dometic relay

Details: The ACM135 and ACM150 upper units will plug directly into the following current model Dometic A/C relay kits:

- Analog Model - #3107541.009 and #3107541.017
- Comfort Control Center - Model #3109226.005

Notes:

There may be older analog model relay kit numbers which will also connect, provided the 6 pin connector matches the Dometic relay box. Dometic kit #'s are (NLA) no longer available.

The older Bi-metal thermostat and relay kit may also work, however the kits are (NLA) no longer available to confirm operation.
